DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-17 and 33-34, drawn to a glass washing machine, classified in class 15, subclass 77.
 - II. Claims 18-32, drawn to a method of washing glass, classified in class 134, subclass 6.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another and materially different apparatus which does not include a conveyor, for example by means of a lifting arm. Additionally the method could be used without a conveyor drive motor or brush motor, as recited in the apparatus limitations of claim 10. It should be noted that claims 33-34 are now grouped with Group I since claims 33-34 are directed to a glass sheet washing machine.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
